

80mm computer fan with temperature indication

General information

This colourful 80 mm fan creates a good air current in the motherboard and it will keep your components cool during usage. As an extra feature this fan shows the temperature. As the fan starts spinning the LEDs will show the text "cool" and the current temperature in the case.

This fan can be connected directly to the motherboard, but is best used in combination with a fan control unit.

Specifications

Type:	System Cooler
Voltage:	12 V
Voltage Type:	DC
Width:	80 mm
Height:	80 mm
Depth:	40 mm
Air Flow:	19 CFM
Sound Level:	29 dB(A)
Speed:	2250 RPM
Bearing Type:	Sleeve
Fans:	1
Material:	Plastic
Colour:	Black
LED Illumination:	Yes
